

GASKETS

IN A FLASH...

Ohio Valley Gasket now offers computer controlled cutting with the addition of an Atom Flash Cutter. Precision cutting using reciprocating knives allows us to cut a wide variety of material and hold extremely tight tolerances. Advanced software converts customer's blueprints to usable files which are entered directly into the Flash Cutters CAD system. Speed and accuracy enable us to supply gaskets quickly to our customers reducing downtime and loss of production.

It will cut almost any type of material including hard durometer rubber as well as tanged graphite, teflon, compressed non-asbestos, felt, cork, and sponge.

From small prototype quantities to thousands of pieces, Ohio Valley Gasket has the capabilities to supply your gasket and fluid sealing needs in a timely manner.
